Beautifil Flow Plus

Beautifil Flow Plus, previously only available in a syringe delivery system, is now also available in compules. BEAUTIFIL Flow Plus is the next step in the evolution of restorative materials, combining the convenience of a flowable with the physical properties and functionality that rivals leading hybrids.

Approved for all indications, including Class II, BEAUTIFIL Flow Plus presents a novel way to complete restorations quickly and easily using a single material, filled all the way up to the occlusal surface. Shofu's proprietary S-PRG (Surface Pre-Reacted Glass) technology also provides sustained fluoride release and recharge making it ideal for high caries index patients, or as a glass ionomer alternative.

A smooth, self-leveling composition reduces the need to over-handle the material, speeding the restoration process and simplifying polishing. Unlike other flowables, BEAUTIFIL Flow Plus has superior "stay-put" handling, amazing tooth-like light diffusion and chameleon properties that provide highly aesthetic solutions without the need to stock every conceivable shade variation.

F00
Zero Flow

Stackable

F03
Low Flow

Self-leveling

Additionally, the material has
15% more radiopacity than
enamel.

Beautifil Flow Plus compules
are available in both viscosities,
F00 (Zero Flow) for precision
stacking, and F03 (Low Flow) for
traditional flowability.

*Visit www.shofu.com, for the complete selection of BEAUTIFIL Flow Plus.

Featured Product

Use OneGloss® PS & Super-Snap® SuperBuff Get 4X Greater Gloss!

Recently, internal testing shows when One Gloss® PS is followed by Super-Snap® Superbuff® Disks, a 4x greater gloss is achieved!

One Gloss® PS is an aluminum oxide one-step finisher and polisher that provides the ideal finish for all types of composite and temporary crowns as well as the removal of excess cement and difficult stains from the enamel surface. Available in 3 different shapes and a convenient, single-use system, One Gloss® PS is pre-mounted on a sturdy plastic latch-head shank and durable enough to withstand polishing an entire arch. Pressure sensitive, you can finish by pressing firmly at first then using a feather technique to polish. The Dental Advisor recently conducted a gloss test showing One Gloss® PS used in conjunction with Super-Snap® Superbuff® Disks resulted in a gloss level of 68, a level double that of its multi-step competitors.

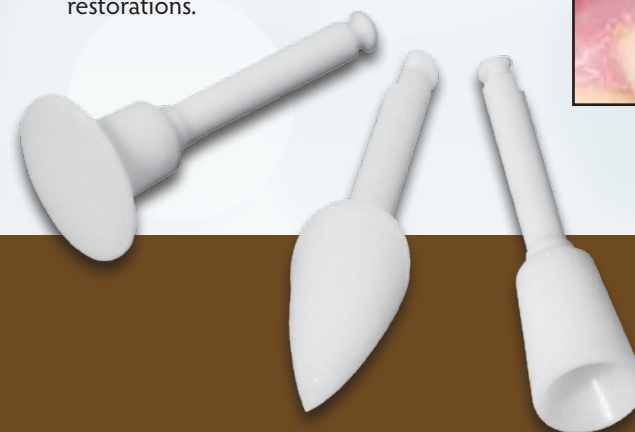

One Gloss® PS provides the ideal finish for all types of composite and cemented restorations.

Super-Snap® SuperBuff Disks can be used for the final polish on all composites. These disks are paste-impregnated and when exposed to water, release a high quality polishing paste. Super-Snap® SuperBuff Disks are disposable and eliminates the potential mess associated with polishing paste syringe systems.

Achieving a 4x greater gloss with One Gloss® PS and Super-Snap® Superbuff® Disks, now that's something to smile about!

For more information visit www.shofu.com or contact Shofu Dental Corporation at 1-800-827-4638.

3 NEW SHAPES! Dura-Green® DIA Stones

Dura-Green® DIA Stones are now available in 3 new shapes! A vitrified-bonded diamond abrasive and the diamond version of a carborundum point, Dura-Green® DIA is designed for contouring porcelains and ceramic copings with superior results. These stones provide enhanced performance with a smoother, chipless cut versus silicon carbide or diamond burs. Densely packed diamonds are embedded throughout (from the surface to the core) in a special glass binder offering extended cutting ability. Now in 3 new shapes (flame, round and tapered cylinder) and available in both Contra-Angle (CA) and Handpiece (HP), Dura-Green DIA Stones are the clean cutting solution for both technicians and dentists alike.
